

## Linux Eduroam Installation Setup

1-) Download the certificate file for **Linux** from <http://eduroam.boun.edu.tr/ca.pem>.

2-) From the **Network** menu in the top right corner, click **eduroam**.

3-) Enter your details;

Wireless Security: **WPA & WPA2 Enterprise**

Authentication: **Tunneled TLS (TTLS)**

CA certificate: **ca.pem** (the certificate we downloaded in step 1)

Inner authentication: **PAP**

Username: BOUN Your e-mail account.

Password: Your password belongs to your e-mail account.

**Wireless Network Authentication Required**

**Authentication required by wireless network**

Passwords or encryption keys are required to access the wireless network 'eduroam'.

Wireless security: WPA & WPA2 Enterprise

Authentication: Tunneled TLS

Anonymous identity:

CA certificate: (None)

Inner authentication: PAP

Username: username@boun.edu.tr

Password: \*\*

Ask for this password every time

Show password

Cancel Connect

4-) Click on **Connect** button.

The image shows a dialog box titled "Wireless Network Authentication Required". It contains a Wi-Fi icon and the text "Authentication required by wireless network". Below this, it states "Passwords or encryption keys are required to access the wireless network 'eduroam'". The dialog has several input fields: "Wireless security" (WPA & WPA2 Enterprise), "Authentication" (Tunneled TLS), "Anonymous identity" (empty), "CA certificate" (ca.pem), "Inner authentication" (PAP), "Username" (username@boun.edu.tr), and "Password" (masked with \*\*). There are two checkboxes at the bottom: "Ask for this password every time" and "Show password". At the bottom right, there are "Cancel" and "Connect" buttons. The "Connect" button is highlighted with a red circle.
